FY 2011-12 Proposed Tuition and Fees Rate Increase  

Board of Trustees Meeting  
December 10, 2010  

The proposed tuition and fee increases for North Carolina Central University are presented for your review and approval prior to submission to UNC-General Administration and the UNC Board of Governors. This information was presented to the Board of Trustees during a tuition and fees policy discussion at its November 16, 2010 meeting. University administration met with the undergraduate and graduate students the evenings of November 18th and 22, 2010. The recommendations presented in this document were discussed with the students. The students had several questions about the recommendations; however, they did not voice a disapproval of the recommended tuition and fee increases. As discussed at the November 2010 Board of Trustee meeting, the next step is your review and decision about the tuition and fee recommendations.  

The following table summarizes the tuition and fees ceiling for NCCU as established by the Tuition and Fees Four Year Plan approved by the Board of Governors in 2010. For undergraduate resident students, the tuition and fee rates cannot exceed 6.5% and the tuition and fee rates for undergraduate resident students must remain in the lowest quarter of its peer institutions. NCCU met those requirements in this recommendation.

In addition, proposed rates increases are recommended to support the residential and food service operations. The housing increases (5% on all residence halls) are needed to support the total cost of housing, fund expanded programming, and provide funds for furniture and equipment replacement. The proposed meal plan changes are in response to a comprehensive review of the food services program. The review included focus group discussions and surveys to gain student feedback on desired meal plan options. The students asked for extended hours of operation, expanded meal plan choices, and additional flex dollars which can be used at any food service venue or concept store on campus.

The below table reflects the impact of all of the increases based on the total cost of attendance for a freshman undergraduate student.

If the proposed tuition, general fees, housing and dining rates is approved, the total cost of attendance for an undergraduate resident student would increase 6% for undergraduate resident students and 3% for undergraduate nonresident students. This assumes the student would reside on-campus, and obtain a 21-meal plan. Tables 7 and 8 on the subsequent page show the requested changes in the housing and dining rates.

Introduction

As we celebrate the end of our Centennial, North Carolina Central University (NCCU) is at a critical juncture of our trajectory. We take pride in numerous accomplishments such as enrolling the largest freshman class ever in 2010-2011; being named the highest ranked public HBCU in the country according to *U.S. News & World Report*, two years in a row; having the “Best Value Law School” according to *National Jurist Magazine*, two years in a row; having over 40,000 alumni and approximately 8500 current students; successfully moving to Division 1; and many other notable achievements.

As we reflect on our past and the opportunities for the future and more specifically, the next 5-10 years, we do so in the context of an uncertain economic climate. There are increasing expectations from University of North Carolina (UNC) General Administration, the UNC Board of Governors, and our Board of Trustees to increase retention and graduation rates, enroll better prepared students, conduct cutting edge research, and stimulate the state’s economic landscape. As part of our ongoing strategic planning process, we have developed **NCCU 2020** which focuses on current and future needs of the University in five priority areas:

Retention and Graduation

Enhancing Academic Distinction and Distinctiveness

Community Engagement

Internal Communications Using QSI

Teaching, Learning and Research

Vision

To be recognized as one of the region’s leading public universities known for academic excellence in a diverse cultural and educational environment.

Mission

The mission of the university is to prepare students academically and professionally to become leaders prepared to advance the consciousness of social responsibility in a diverse, global society. The university will serve its traditional clientele of African-American students; it will also expand its commitment to meet the educational needs of a student body that is diverse in race and other socioeconomic qualities.
Core Values

At North Carolina Central University, we value all members of our community and we support intellectual thought and accomplishment. Student success is our highest priority. NCCU 2020 reflects our commitment to our mission and undergirds the following key core values of the University:

Excellence in teaching, research, scholarship, and creativity

Promotion of citizenship, service, and social justice

Appreciation of and respect for diverse cultures

Commitment to life-long learning

Historical Background

North Carolina Central University (NCCU) was founded in 1910 as the National Religious Training School and Chautauqua. It is the nation’s first public liberal arts institution founded for African-Americans. The college was given university status in 1969 and the name was changed to North Carolina Central University. The University became part of the University of North Carolina System in 1972.

NCCU is a comprehensive university offering programs at the baccalaureate, master’s, and selected professional levels. The university upholds a strong liberal arts tradition and a commitment to academic excellence in a diverse cultural and educational environment. It seeks to encourage intellectual productivity and to increase the academic and professional skills of its students and faculty.

Teaching, supported by research, is the primary focus of the university. As a part of that focus, the university encourages its faculty to pursue intellectual development and rewards effective teaching and research. The university recognizes, however, the mutually reinforcing impact of scholarship and service on effective teaching and learning. North Carolina Central University, therefore, encourages and expects faculty and students to engage in scholarly, creative, and service activities, which benefit the community.

Basic Assumptions

NCCU 2020 is committed to transforming our campus to address pressing needs in our state and region. Student success is impacted by the quality of an education and the availability of resources to support student learning. In addition to the NCCU 2020 Planning Committee reviewing numerous internal and external documents highlighting the challenges and opportunities for higher education, the following assumptions were outlined prior to the implementation of the planning process.

1. The University is poised to achieve higher levels of responsiveness and competitiveness by focusing on its core strengths while addressing the needs of the State of North Carolina.
2. UNC constituent universities will be held to increasingly higher levels of accountability with respect to retaining and graduating students.

3. With the decline in state appropriations, the University will need to strengthen internal controls, efficiency, and effectiveness.

4. With the shift in the demographics of the State of North Carolina, there will be increased competition for students who in the past have typically enrolled at HBCUs.

5. Amid an environment characterized by demographic shifts, intense competition for students, and declining state appropriations, the University must change the narrative around the contemporary role of HBCUs.

**Goals, Objectives and Metrics**
