6TH ANNUAL TECHNOLOGY INSTITUTE FOR EDUCATORS

“Teaching with Digital Materials and Learning Technologies”
Friday, April 25 & Saturday, April 26, 2014

Keynote Speakers

Chancellor Debra Saunders-White
North Carolina Central University

Superintendent Timothy Farley
Granville County Schools

Superintendent Ray V. Spain
Warren County Schools

Superintendent James Merrill
Wake County Public School System
A MESSAGE FROM...

School of Education Dean
Welcome to the 6th Annual Technology Institute for Educators. The School of Education is elated that you are joining us as we continue on our learning journey into the exciting world of “Teaching with Digital Materials and Learning Technologies,” which is this year’s theme. Technology, for some, is a rather nebulous term with definitions that vary across generations, cultures, and professional fields. We are in an era where the general citizenry knows that technology is not limited to gadgetry; it includes software that lends utility to devices. However, as educators, we know that technology also includes the knowledge, disposition, and capacity to use technology successfully. The power of the 21st century educator lies in the ability to foster learning among a diverse student population through the effective use of these rapidly evolving digital materials and learning technologies.

We recognize that the digital student is one who lives in a world with technological norms that change daily. This reality is what drives the School of Education to produce culturally competent, highly qualified teachers and other school personnel who are proficient in using digital materials and learning technologies to facilitate students’ academic performance across subjects, regardless of learning style or cognitive ability.

We encourage you to actively engage in the Institute’s planned activities, we challenge you to find innovative ways to use what you learn here to fuel students’ thirst for knowledge, and we invite you to join us again next year, April 23-24, 2015.

— Wynetta Lee, Dean, NCCU School of Education

ABOUT THE TECHNOLOGY INSTITUTE

The Technology Institute for Educators was founded as a summer service project in 2009 by Dr. Prince Hycy Bull, while he was the program coordinator of the Educational Technology Program. Dr. Bull continues to coordinate the Institute as a service project with the support of graduate students in the Educational Technology Program, as well as faculty and staff of the School of Education. In creating the Institute, Dr. Bull envisaged a collaborative, engaging, and stimulating professional development environment with three major goals:

1. To provide an avenue for K-20 educators to share best practices, discuss trends, collaborate, and present research in the area of integrating learning technologies in teaching and learning.

2. To provide a platform for graduate students in the Educational Technology Program to share their research, hone their presentation skills, and share knowledge gained in the program.

3. To provide professional development opportunities in learning technologies for educators and school systems with limited resources to address current practices, trends, and best practices in integration learning technologies.

Over the years, the Institute has addressed several key themes in learning technologies aligned with trends and best practices. The year’s theme is Teaching with Digital Materials and Learning Technologies. The Institute has attracted educators from all levels and disciplines of education, particularly from the southeastern region of the United States. Keynote speakers have included Mr. Roger Wagner, Hyperstudio 5 software developer; Dr. Barry Adams, education consultant for Apple Inc.; North Carolina State Superintendent Dr. June Atkinson; Superintendent Mark Edwards, Mooresville School District; Mr. Bruce Friend, president and co-founder of Ignite Learning Partners; Mr. Tony Tata, secretary of the N.C. Department of Transportation; Dr. Eric Becoats, former superintendent of Durham Public Schools; Dr. Robin Angotti, associate professor of Mathematics at Washington University, Bothell and Dr. William Logan, Principal of Hillside High School, Durham.

Since its inception, the Institute has generated its funding from registration, sponsors and vendors. Donations and sponsorships are welcome to expand the goals of the Institute to include scholarships to deserving NCCU graduates, undergraduate teacher education candidates, and to teachers and instructional assistants from across North Carolina to participate in the Institute. To make a contribution or to sponsor the 2015 Institute, contact Dr. Bull or write a check to the NCCU Foundation and on the memo line write SOE Technology Institute #83660.

— Prince Hycy Bull, Ph.D., Program Chair. Chair, Curriculum and Instruction, NCCU School of Education
Debra Saunders-White, Ed.D., began as the 11th chancellor of North Carolina Central University on June 1, 2013. She was selected by the Board of Governors of the multi-campus University of North Carolina on February 8, 2013.

Saunders-White started her tenure with the goal of “Eagle Excellence,” or “E-squared.” Her priorities for ensuring student success and academic excellence include: retaining and graduating students in four years; raising critical scholarship funds; and providing innovative academic instruction that prepares and trains students to work in the global marketplace. At NCCU, Saunders-White aims to create “techno-scholars,” or technology trendsetters and leaders who understand how technology intersects with all disciplines—from STEM to the liberal arts, social sciences, business, education, law and nursing.

Previously, Saunders-White served as acting assistant secretary for the Office of Postsecondary Education at the U.S. Department of Education. Saunders-White joined the Department of Education in May 2011 as the deputy assistant secretary for higher education programs. As acting assistant secretary, Saunders-White’s responsibilities included formulating federal postsecondary education policy to incorporate federal student aid, programs that address critical national needs in support of the department’s mission to increase access to quality postsecondary education, and programs that support international and foreign language education.

Prior to entering higher education administration, Saunders-White spent 15 years in the corporate sector at IBM. From 1994 to 1998, Saunders-White taught college-preparatory mathematics at St. George’s School in Newport, R.I. In 1999, she joined Hampton University as assistant provost for technology and she was promoted to the newly created post of vice president for technology and chief information officer in 2005.

Saunders-White left Hampton the following year to join the University of North Carolina Wilmington (UNCW) as vice chancellor for information technology systems. From 2007 to 2008, she also served concurrently as UNCW’s interim associate provost in the Office of Institutional Diversity and Inclusion and as chief diversity officer. A Hampton, Va., native, Saunders-White earned her bachelor’s degree in history from the University of Virginia. She earned a master’s of business administration from The College of William & Mary and a doctorate in higher education administration from The George Washington University.

Saunders-White is a member of Alpha Kappa Alpha Sorority Inc. and a member of the Links Inc. She is the mother of two children, Elizabeth Paige and Cecil III.
KEYNOTE SPEAKERS

Superintendent James Merrill,
Wake County Public Schools
“The use of digital materials and learning technologies in today’s classrooms are critical as we prepare students to lead successful lives in a complex global community. That is why the Wake County Public School System seeks nothing less than continuous transformation of the learning and teaching process through expanded collaboration and intervention strategies for both learning and infrastructure. Our vision for creating 21st Century learning begins with the student, under the leadership of a master teacher, who leverages technology to deliver engaging and powerful learning experiences. These learning experiences are sustained by robust and reliable access to current and emerging technologies and digital resources with equal connectivity for all students, teachers, staff, and leaders.”

Superintendent Ray Spain,
Warren County Schools
“We have seen tremendous changes in the use of digital materials and an explosion of personal digital devices in our schools. No longer can we ignore the availability of this personal technology. Our challenge is, how do we leverage the use of these new technologies to improve teaching and learning.”

Superintendent Timothy Farley,
Granville County Schools
“Today’s teachers are undoubtedly well aware of the need to use all things digital in helping their students succeed. But it’s not easy. Granville County’s experience should serve as a model of both how to/how to not make the transition to using digital devices and technologies in the classroom.”

GUEST SUPERINTENDENTS

Superintendent Lisa L. Martin,
Franklin County Public Schools
Prior to relocating to North Carolina, Dr. Martin served as the Assistant Superintendent of Secondary Schools and Support Services for Stafford County Public Schools, in Stafford, Virginia. She supervised all middle and high school programs, the alternative education programs, homebound instruction, and the support areas of Human Resources, Technology and Safety, Security and Risk Management. Dr. Martin has also served as an Assistant Principal in Stafford County Public Schools and was formerly the building principal of Colonial Forge High School from 1998 – 2011, before being appointed as the Assistant Superintendent for Secondary Schools.

Superintendent Ronald E. Gregory,
Vance County Schools
What an excellent theme for the 6th Annual Technology Institute. The main objective of teaching is student achievement. Therefore, as educators, we must address the “how” and the “what” we teach that will cause our students to be proficient life-long learners. In today’s world, digital technologies is leading the way in student achievement from elementary to high school and throughout our college and university systems. We teach, we access, we interpret data and we re-teach. Digital technology allows us to do so with speed and accuracy, thus enhancing student learning. Digital technology is the change agent to raise student achievement. Students learn best when they are able to interact with the teaching process through Digital Technology. In many areas the trend is "extreme BYOD" meaning Bring Your Own Devices for teaching and learning. Technology is leading the way in educating our students.
