

Install the VMware Horizon Client on Windows

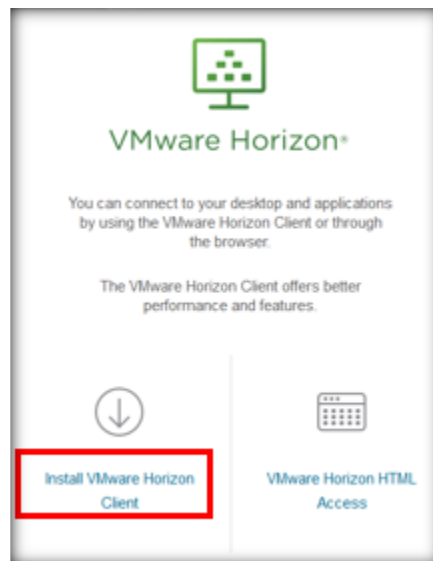

The following document outlines instructions for installing VMware Horizon Client on your desktop or laptop computer running MS Windows 7 or higher. **NOTE: THE INSTALLATION WILL REQUIRE A RESTART OF YOUR MACHINE.** Save and close any open files or applications before beginning the installation.

Step 1

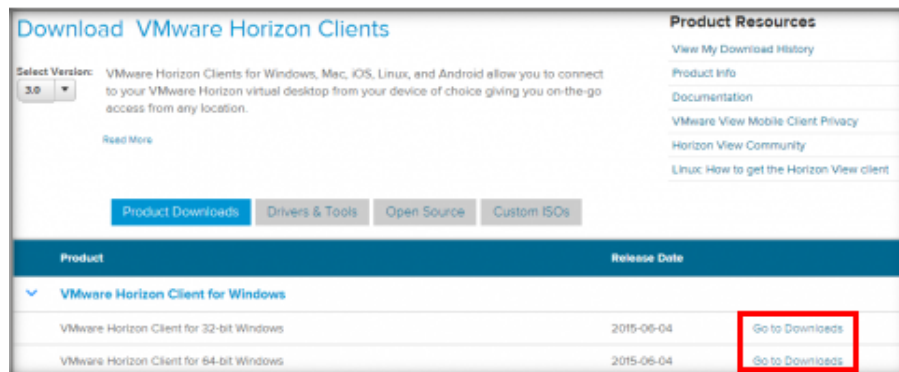

Navigate to the VMware Horizon page at <https://eagleapps.nccu.edu>.

Select the icon for **Install VMware Horizon Client**.

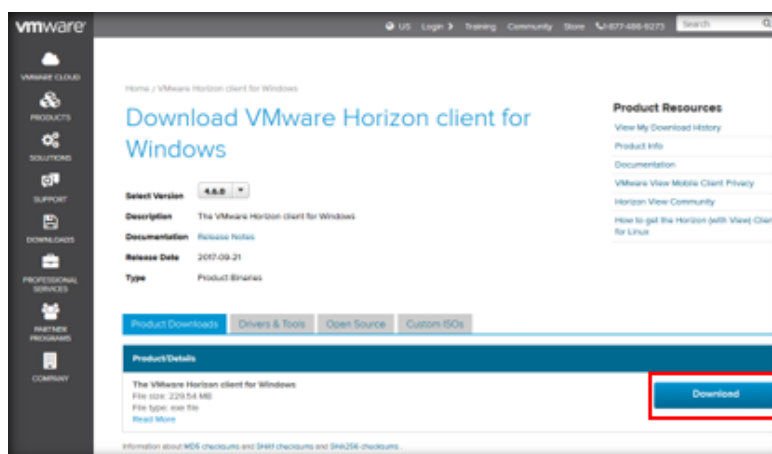

Step 2

Under the section for VMware Horizon Client for Windows, select **Go to Downloads** next to the Windows client listing.

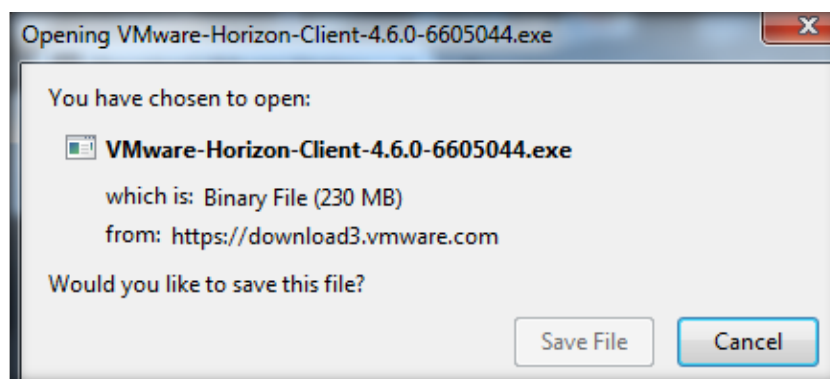

Step 3

On the product download page, click the **Download** button.

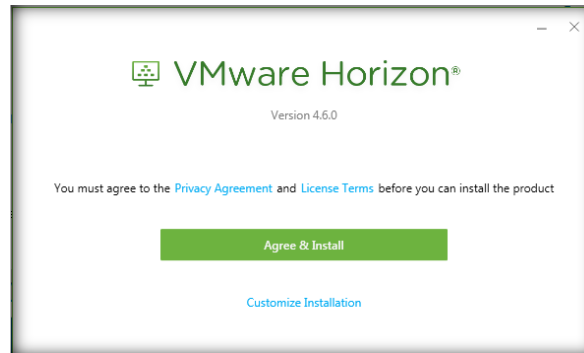

Step 4

Save File and Double-click the file you downloaded to start the installation.

Step 5

Agree to the user terms by clicking **Agree & Install**

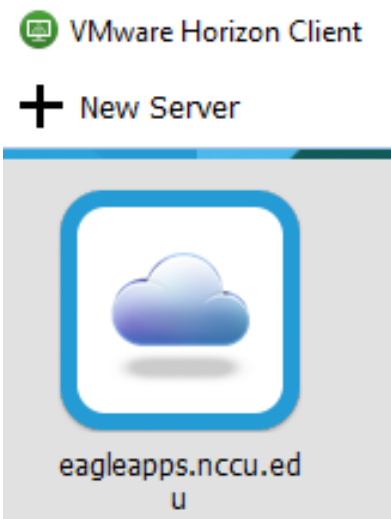

Step 6

Open the VMware Horizon Client from your Start Menu.

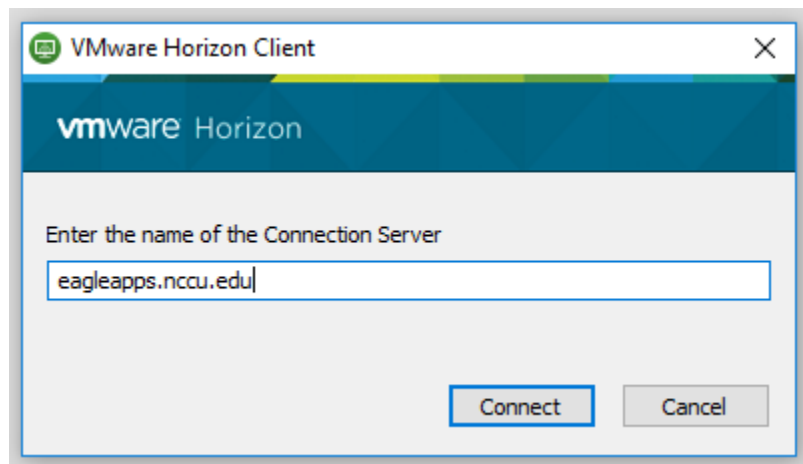

Step 7

Click **New Server**.

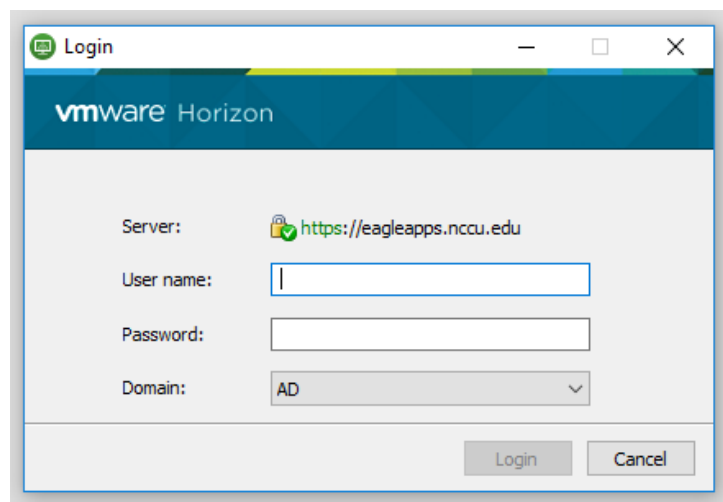

Step 8

Enter the Connection Server name **eagleapps.nccu.edu**

Step 9

Login with your campus **username and password**

The home screen will open displaying all of your available applications. Double-click an application to open it.
